

ENVIRONMENTAL SCIENCE: WORKING WITH THE EARTH, Ninth Edition is a concise alternative to G. Tyler Millers best-selling text LIVING IN THE ENVIRONMENT, which redefines the environmental science course and sets the standard by which every other book for this course is judged. This Ninth Edition is a significant, all-encompassing revision providing greater focus on the basic scientific content necessary to understand environmental issues in clear, straightforward language. It provides the latest developments and reflects several major shifts in environmental science education that are taking place in this century. Designed as a foundational text for environmental science courses, Millers flexible book is adaptable to almost any approach, and is the most widely embraced approach to environmental science in print today. With fair and balanced coverage and Internet tools integrated throughout, the book features an extensively developed art program, writing that communicates scientific information clearly and effectively, and the most current coverage of the subject. The books flexible organization means that it can be adapted to fit almost any syllabus. Millers more than thirty years of research and teaching expertise make this the definitive book on the subject.
