

The Third Testicle is the story of a journey. A journey through the past. A journey through Europe. A journey which touches on drugs, madness, the surreal, on criminal gangs, Police undercover work, busking and international espionage. But above all it is a spiritual journey of unique idiosyncrasy. Or maybe not. It is the story of one Gerald Brantano, a swashbuckling Englishman who sets off on a journey searching for something which will ultimately change his life forever. The end of the world has already been forecast to occur in 2012 by an ancient Andean prophecy and somehow Brantano finds himself in the very place which will supposedly offer shelter from the impending Armageddon. Watch this space - it lies beyond the world of words!
